

Opportunity Mapping & Proposal Writing

1. Opportunity Mapping

We propose to conduct tailored grant and tender opportunity research based on priorities and keywords agreed during an initial consultation. The research will focus on funding opportunities that are relevant to your organization at both local and international levels.

Weekly deliverable:

A structured Excel spreadsheet, delivered every Friday, where each opportunity includes Grant / tender title; Application deadline; Available budget; Eligibility criteria; Short description and relevance summary. This format allows your team to quickly assess opportunities and decide which ones to pursue.

Please let us know if you feel like pursuing this package, and we will share an email with further steps, including a calendar to book your convenient date and time.

2. Proposal Writing

Should you identify a grant opportunity you wish to pursue, we will agree on a separate financial proposal for each application package. The package includes proposal writing, submission, and teh consecutive narrative reporting for the donor.

Please let us know if you feel like pursuing this package, and we will share an email with further steps, including a calendar to book your convenient date and time.

Looking forward to working with you!

Best regards,
Fundforce team
